EDUCATION

ETH, Zurich

September 2018 - April 2021

M.Sc. in Computer Science
Partial GPA: 5.4 (out of 6.0)

Sapienza University, Rome

September 2015 - June 2018

B.Sc in Engineering in Computer Science
Final grade: 110 cum laude (out of 110)

EXPERIENCE

Software Engineer & Research Assistant

July 2019 - December 2019

Network Security Group, ETH

Zurich, Switzerland

- Increased SCION Web App user engagement by 30% by redesigning Database and API to include a feature to experiment with network multipath technology. [**Python** (Django), HTML/**JavaScript**]
- Built a SCION compatible home router (SCION Box) to allow for the widespread adoption of the SCION internet architecture. [**OpenWRT**, Linux **net-tools**]

RELEVANT COURSEWORK

Algorithms Laboratory (ETH)

September 2019 - January 2020

- Course on solving competitive programming problems by implementing a combination of basic (Greedy, Dynamic Programming, Graphs) and advanced (Network Flow) algorithms. [**C++**]

Advanced Operating Systems (ETH)

March 2019 - June 2019

- Developed a research-oriented microkernel in a team of 3.
- Implemented physical and virtual memory manager, inter-process communication, and filesystem. [**C**]

LEADERSHIP AND AWARDS

- Speaker at the SCION Day conference with investors presenting the SCION Box ([talk available here](#))
- Hosted the first security Capture The Flag event at ETH
- Selected as one of 5 participants of Sapienza University's Honors Program for a semester-long research project about dynamic malware analysis. [**C++**, Intel Pin]
- Awarded with Mario Negri scholarship for outstanding results achieved during my B.Sc. studies

PROGRAMMING LANGUAGES AND COMPUTER SCIENCE

Python, C, C++, JavaScript, SQL

Linux, TCP/IP, Data structures, Hadoop

EXTRACURRICULAR ACTIVITIES

- Freelancer full-stack developer realizing ad-hoc solutions for small companies. [Django, Android]

Google Workshop for Cloud and Development

November 2017 - June 2018

Sapienza University/Google Tel Aviv

Rome, Italy/Tel Aviv, Israel

- Coordinated a team of 5 to build a Web platform to drastically ease and speed up the sharing of findings between the malware researchers community. [**Python**, HTML/**JavaScript**]
